ISBN 0-521-43348-7 Hardback

ISBN 0-521-43965-5 Paperback

Contents

<i>Preface</i>	<i>page</i> xiii
<i>Preface to the first edition</i>	xv
1 Introduction	1
1.1 The concept of holographic imaging	1
1.2 Early studies	4
1.3 The development of optical holography	6
2 Wavefront reconstruction	11
2.1 The in-line (Gabor) hologram	11
2.2 The off-axis (Leith-Upatnieks) hologram	13
2.3 Fourier holograms	18
2.4 The lensless Fourier hologram	20
2.5 Image holograms	21
2.6 Fraunhofer holograms	23
3 The reconstructed image	25
3.1 Images of a point	25
3.2 Image magnification	28
3.3 Orthoscopic and pseudoscopic images	29
3.4 Image aberrations	31
3.5 Misalignment, source size, and spectral bandwidth	35
3.6 Image luminance	38
3.7 Image speckle	40
4 Types of holograms	45
4.1 Thin holograms	45

4.2	Volume holograms	48
4.3	The coupled wave theory	48
4.4	Volume transmission holograms	52
4.5	Volume reflection holograms	55
4.6	Discussion	60
4.7	More accurate theories	61
4.8	Criteria for thin holograms and volume holograms	63
4.9	Anomalous effects with volume gratings	65
4.10	Multiply-exposed volume holographic gratings	65
4.11	Imaging properties of volume holograms	66
5	Optical systems and light sources	69
5.1	Stability requirements	69
5.2	Fringe visibility	71
5.3	Beam polarization	72
5.4	Beam splitters	72
5.5	Beam expansion	74
5.6	Exposure control	75
5.7	Coherence requirements	75
5.8	Temporal coherence of laser light	76
5.9	Laser safety	78
5.10	Gas lasers	79
5.11	Dye lasers	80
5.12	Diode lasers	80
5.13	Pulsed lasers	81
5.14	Holography with pulsed lasers	83
6	The recording medium	85
6.1	Macroscopic characteristics	85
6.2	The modulation transfer function	85
6.3	Diffraction efficiency	87
6.4	Image resolution	88
6.5	Nonlinearity	89
6.6	Effect of hologram thickness	91
6.7	Noise	92
6.8	Signal-to-noise ratio with coherence illumination	93
7	Practical recording materials	95
7.1	Silver halide photographic emulsions	95

7.2	Dichromated gelatin	107
7.3	Photoresists	112
7.4	Photopolymers	114
7.5	Photochromics	115
7.6	Photothermoplastics	116
7.7	Photorefractive crystals	119
7.8	Spectral hole-burning	122
8	Holograms for displays	125
8.1	360° holograms	125
8.2	Double-sided holograms	126
8.3	Composite holograms	128
8.4	Holographic stereograms	128
8.5	Edge-lit holograms	130
8.6	Rainbow holograms	131
8.7	White-light holographic stereograms	139
8.8	Holographic movies	142
8.9	Holographic video imaging	143
9	Colour holography	145
9.1	Light sources for colour holography	145
9.2	The cross-talk problem	147
9.3	Volume holograms	147
9.4	Volume reflection holograms	148
9.5	Multicolour rainbow holograms	152
9.6	Pseudocolour images	155
9.7	Achromatic images	156
9.8	Achromatic and pseudocolour stereograms	158
10	Computer-generated holograms	163
10.1	Binary detour-phase holograms	164
10.2	Generalized binary detour-phase holograms	168
10.3	Phase randomization	169
10.4	Error diffusion methods	170
10.5	The kinoform	170
10.6	The ROACH	172
10.7	Three-dimensional objects	174
10.8	Computer-generated interferograms	176
10.9	Computer-generated holograms in optical testing	177

11	Special techniques	181
11.1	Polarization recording	181
11.2	Holography with incoherent light	184
11.3	Time-gated holography	190
11.4	Hologram copying	191
12	Applications in imaging	197
12.1	Holographic microscopy	197
12.2	Particle-size analysis	197
12.3	Imaging through moving scatterers	200
12.4	Imaging through distorting media	201
12.5	Correction of aberrated wavefronts	201
12.6	High-resolution projection imaging	204
12.7	Evanescent-wave holography	205
12.8	Multiple imaging	210
13	Holographic optical elements	213
13.1	Holographic diffraction gratings	213
13.2	Holographic filters	216
13.3	Holographic scanners	218
13.4	Holographic optical elements	220
14	Information storage and processing	225
14.1	Associative storage	225
14.2	Pattern recognition	228
14.3	Coding and multiplexing	230
14.4	Image processing	232
14.5	Space-variant operations	233
14.6	Information storage	235
14.7	Holographic interconnections	238
14.8	Optical neural networks	241
15	Holographic interferometry	245
15.1	Real-time holographic interferometry	246
15.2	Double-exposure holographic interferometry	248
15.3	Sandwich holograms	250
15.4	Industrial environments	252
15.5	Phase objects	254
15.6	Phase-conjugate interferometry of phase objects	256
15.7	Diffusely reflecting objects	256

15.8	Fringe localization	258
15.9	The holo-diagram	262
15.10	Holographic strain analysis	264
15.11	Holographic moiré interferometry	267
15.12	Difference holographic interferometry	267
16	Holographic interferometry: Further applications	271
16.1	Vibrating surfaces	271
16.2	Holographic photoelasticity	280
16.3	Holographic contouring	285
17	Holographic interferometry: Advanced techniques	291
17.1	Photorefractive crystals	291
17.2	Computer-aided evaluation	297
17.3	Heterodyne holographic interferometry	299
17.4	Phase-shifting	301
17.5	Electronic holographic interferometry	307
17.6	Current trends	310
Appendixes		
1	Interference and coherence	311
2	The Fourier transform, convolution, and correlation	317
3	Wave propagation and diffraction	323
4	Speckle	329
5	The H & D curve	335
